Resolution A.918(22)

**Adopted on 29 November 2001
(Agenda item 9)**

IMO STANDARD MARINE COMMUNICATION PHRASES

THE ASSEMBLY,

RECALLING Article 15(j) of the Convention on the International Maritime Organization concerning the functions of the Assembly in relation to regulations and guidelines concerning maritime safety,

RECALLING ALSO resolution A.380(X) by which it adopted the Standard Marine Navigational Vocabulary,

RECALLING FURTHER the provisions of regulation V/14.4 of the International Convention for the Safety of Life at Sea, 1974, requiring that on all ships to which chapter I thereof applies, English shall be used on the bridge as the working language for bridge-to-bridge and bridge-to-shore safety communications as well as for communications on board between the pilot and bridge watchkeeping personnel unless those directly involved in the communications speak a common language other than English,

RECOGNIZING that the standardization of language and terminology used in such communications would assist the safe operation of ships and contribute to greater safety of navigation,

RECOGNIZING ALSO the wide use of the English language for international navigational communications and the need to assist maritime training institutions to meet the objectives of safe operations of ships and enhanced navigational safety through, *inter alia*, the standardization of language and terminology used,

HAVING CONSIDERED the recommendations of the Maritime Safety Committee at its sixty-eighth and seventy-fourth sessions,

1. ADOPTS the IMO Standard Marine Communication Phrases set out in Annex 1 to the present resolution;

For reasons of economy, this document is printed in a limited number. Delegates are kindly asked to bring their copies to meetings and not to request additional copies.

2. AUTHORIZES the Maritime Safety Committee to keep the IMO Standard Marine Communication Phrases under review and to amend them when necessary in accordance with the procedure set out in Annex 2 to the present resolution;
3. RECOMMENDS Governments to give the IMO Standard Marine Communication Phrases a wide circulation to all prospective users and all maritime education authorities, in order to support compliance with the standards of competence as required by table A-II/1 of the STCW Code;
4. REVOKES resolution A.380(X).

As navigational and safety communications from ship to shore and vice versa, from ship to ship, and on board ship must be precise, simple and unambiguous so as to avoid confusion and error, there is a need to standardize the language used. This is of particular importance in the light of the increasing number of internationally trading vessels with crews speaking many different languages, since problems of communication may cause misunderstandings leading to dangers to the vessel, the people on board and the environment.

In 1973, the Maritime Safety Committee agreed, at its twenty-seventh session that where language difficulties arise a common language should be used for navigational purposes, and that language should be English. In consequence the Standard Marine Navigational Vocabulary (SMNV) was developed, adopted in 1977 and amended in 1985.

In 1992, the Maritime Safety Committee, at its sixtieth session, instructed the Sub-Committee on Safety of Navigation to develop a more comprehensive standardized safety language than SMNV 1985, taking into account the changing conditions in modern seafaring and covering all major safety-related verbal communications.

At its sixty-eighth session in 1997, the Maritime Safety Committee adopted the Draft IMO Standard Marine Communication Phrases (SMCP) developed by the Sub-Committee on Safety of Navigation. The draft IMO SMCP, following international trials, was amended at the forty-sixth session of this Sub-Committee, and was given final consideration by the Maritime Safety Committee at its seventy-fourth session in the light of remarks received by the Organization. The IMO SMCP was adopted by the Assembly in November 2001 as resolution A.918(22).

Under the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers, 1978, as revised 1995, the ability to use and understand the IMO SMCP is required for the certification of officers in charge of a navigational watch on ships of 500 gross tonnage or more.

INTRODUCTION

1 Position of the IMO SMCP in maritime practice

The IMO Standard Marine Communication Phrases (SMCP) has been compiled:

- to assist in the greater safety of navigation and of the conduct of the ship,
- to standardize the language used in communication for navigation at sea, in port approaches, waterways and harbours, and on board vessels with multilingual crews, and
- to assist maritime training institutions in meeting the objectives mentioned above.

These phrases are not intended to supplant or contradict the International Regulations for Preventing Collisions at Sea, 1972 or special local rules or recommendations made by IMO concerning ships' routing, neither are they intended to supersede the International Code of Signals, and their use in ship's external communications has to be in strict compliance with the relevant radiotelephone procedures as set out in the ITU Radio Regulations. Furthermore, the IMO SMCP, as a collection of individual phrases, should not be regarded as any kind of technical manual providing operational instructions.

The IMO SMCP meets the requirements of the STCW Convention, 1978, as revised, and of the SOLAS Convention, 1974, as revised, regarding verbal communications; moreover, the phrases cover the relevant communication safety aspects laid down in these Conventions.

Use of the IMO SMCP should be made as often as possible in preference to other wording of similar meaning; as a minimum requirement, users should adhere as closely as possible to them in relevant situations. In this way they are intended to become an acceptable safety language, using English for the verbal interchange of intelligence among individuals of all maritime nations on the many and varied occasions when precise meanings and translations are in doubt, as is increasingly evident under modern conditions at sea.

The accompanying CD/Cassette is designed to familiarize users with the pronunciation of the phrases.

2 Organization of the IMO SMCP

The IMO SMCP is divided into External Communication Phrases and On-board Communication Phrases as far as its application is concerned, and into Part A and Part B as to its status within the framework of STCW 1978 as revised.

Part A covers phrases applicable in external communications, and may be regarded as the replacement of the Standard Marine Navigational Vocabulary 1985, which is required to be used and understood under the STCW Code, 1995, Table A-II/I. This part is enriched by essential phrases concerning ship handling and safety of navigation to be used in on-board communications, particularly when the Pilot is on the bridge, as required by Regulation 14(4), Chapter V, SOLAS 1974, as revised.

Part B calls attention to other on-board standard safety-related phrases which, supplementary to Part A may also be regarded as useful for maritime English instruction.

3 Position of the IMO SMCP in Maritime Education and Training

The IMO SMCP is not intended to provide a comprehensive maritime English syllabus, which is expected to cover a far wider range of language skills to be achieved in the fields of vocabulary, grammar, discourse abilities, etc., than the IMO SMCP could ever manage. However, Part A in particular should be an indispensable part of any curriculum which is designed to meet the corresponding requirements of the STCW Convention 1978 as revised. In addition, Part B offers a rich choice of situations covered by phrases well suited to meet the communication requirements of the STCW Convention 1978 as revised, which mariners are implicitly expected to satisfy.

The IMO SMCP should be taught and learned selectively according to users' specific needs, rather than in its entirety. The respective instruction should be based on practice in the maritime environment, and should be implemented through appropriate modern language teaching methods.

4 Basic communicative features

The IMO SMCP builds on a basic knowledge of the English language. It was drafted intentionally in a simplified version of maritime English in order to reduce grammatical, lexical and idiomatic varieties to a tolerable minimum, using standardized structures for the sake of its function aspects, i.e. reducing misunderstanding in safety-related verbal communications, thereby endeavouring to reflect present maritime English language usage on board vessels and in ship-to-shore/ship-to-ship communications.

This means that in phrases offered for use in emergency and other situations developing under considerable pressure of time or psychological stress, as well as in navigational warnings, a block language is applied which uses sparingly or omits the function words *the, a/an, is/are*, as done in seafaring practice. Users, however, may be flexible in this respect.

Further communicative features may be summarized as follows:

- avoiding synonyms
- avoiding contracted forms
- providing fully worded answers to "yes/no"-questions and basic alternative answers to sentence questions
- providing *one* phrase for *one* event, and
- structuring the corresponding phrases according to the principle: *identical invariable plus variable*.

5 Typographical conventions

- () **brackets** indicate that the part of the message enclosed within the brackets may be added where relevant;
- / **oblique strokes** indicate that the items on either side of the stroke are alternatives;
- ... **dots** indicate that the relevant information is to be filled in where the dots occur;

(*italic letters*) indicate the kind of information requested;

- ~ **tildes** precede possible words or phrases which can be used after/in association with the given standard phrase.

7 Corrections

When a mistake is made in a message, say:

Correction, my present speed is 12, one-two, knots."

8 Readiness

"I am/I am not ready to receive your message."

9 Repetition

9.1 If any part of the message is considered sufficiently important to need safeguarding, say:
"Repeat ... " - followed by the corresponding part of the message.

Example: "My draft is 12.6 repeat one-two decimal 6 metres."
"Do not overtake - repeat - do not overtake."

9.2 When a message is not properly heard, say:
"Say again (please)."

10 Numbers

Numbers are to be spoken in separate digits:

"One-five-zero" for 150
"Two decimal five" or
"Two point five" for 2.5

Note: Attention! When rudder angles, e.g. in wheel orders, are given, say:

"Fifteen" for 15 or
"Twenty" for 20, etc.

11 Positions

11.1 When latitude and longitude are used, these shall be expressed in degrees and minutes (and decimals of a minute if necessary), North or South of the Equator and East or West of Greenwich.

Example: "WARNING. Dangerous wreck in position 15 degrees 34 minutes North 061 degrees 29 minutes West."

11.2 When the position is related to a mark, the mark shall be a well-defined charted object. The bearing shall be in the 360 degrees notation from true north and shall be that of the position FROM the mark.

Example: "Your position bearing 137 degrees from Big Head lighthouse distance 2.4 nautical miles."

12 Bearings

The bearing of the mark or vessel concerned is the bearing in the 360 degree notation from north (true north unless otherwise stated), except in the case of relative bearings. Bearings may be either FROM the mark or FROM the vessel.

Example: "Pilot boat is bearing 215 degrees from you."

Note: Vessels reporting their position should always quote their bearing FROM the mark, as described in paragraph 11.2 of this section.

12.1 Relative bearings

Relative bearings can be expressed in degrees relative to the vessel's head. More frequently this is in relation to the port or starboard bow.

Example: "Buoy 030 degrees on your port bow."
(Relative D/F bearings are more commonly expressed in the 360 degree notation.)

13 Courses

Always to be expressed in 360 degree notation from north (true north unless otherwise stated). Whether this is to TO or FROM a mark can be stated.

14 Distances

To be expressed in nautical miles or cables (tenths of a mile), the unit always to be stated.

15 Speed

To be expressed in knots:

- 15.1 without further notation, meaning speed through the water; or,
- 15.2. "ground speed", meaning speed over the ground.

16 Times

Times should be expressed in the 24 hour hours hours UTC notation; if local time will be used in ports or harbours it should clearly be stated.

17 Geographical names

Place names used should be those on the chart or in Sailing Directions in use. Should these not be understood, latitude and longitude should be given.

18 Ambiguous words

Some words in English have meanings depending on the context in which they appear. Misunderstandings frequently occur, especially in VTS communications, and have produced accidents. Such words are:

- 18.1 The conditionals "may", "might", "should" and "could"

May

- Do not say: "May I enter the fairway?"
- Say: "QUESTION. Do I have permission to enter the fairway?"
- Do not say: "You may enter the fairway."
- Say: "ANSWER. You have permission to enter the fairway."

Might

- Do not say: "I might enter the fairway."
- Say: "INTENTION. I will enter the fairway."

Should

- Do not say: "You should anchor in anchorage B 3."
- Say: "ADVICE. Anchor in anchorage B 3."

Could

- Do not say: "You could be running into danger."
- Say: "WARNING. You are running into danger."

- 18.2 The word "can"

The word "can" describes either the possibility or the capability of doing something. In the IMO SMCP the situations where phrases using the word "can" appear make it clear whether a possibility is referred to. In an ambiguous context, however, say, for example: "QUESTION. Do I have permission to use the shallow draft fairway at this time?" Do not say: "Can I use the shallow draft fairway at this time?" if you are asking for a permission. (The same applies to the word "may").

Note: In all cases the radiotelephone procedures as set out in the ITU Radio Regulations have to be observed.

.2 Ice - breaker assistance for convoy

Ice-breaker commands applying to all the vessels in a convoy have to be immediately confirmed consecutively by each vessel in turn and executed according to the pattern given in GENERAL 4.6. Ice-breaker commands applying to a single vessel are confirmed and executed only by that vessel, and this applies also to close-coupled towing. When being assisted by an ice-breaker it is important to maintain a continuous listening watch on the appropriate VHF Channel and to maintain a proper lookout for sound and visual signals.

A1/6 Vessel Traffic Service (VTS) Standard Phrases

Application of Message Markers

In order to especially facilitate shore-to-ship and ship-to-shore communication or when one of the IMO Standard Marine Communication Phrases will not fit the meaning desired, one of the following eight message markers may be used to increase the probability of the purpose of the message being properly understood.

It is at the discretion of the shore personnel or the ship's officer whether to use one of the message markers and if so which of them to apply depending on the user's qualified assessment of the situation. If used, the message marker is to be spoken preceding the message or the corresponding part of the message. The IMO VTS Guidelines recommend that in any message directed to a vessel it should be clear whether the message contains **information, advice, warning, or instruction** and IMO Standard Marine Communication Phrases should be used where practicable.

For further standardized VTS communications, also see other sections of Part A1. For VTS Standard Reporting Procedures, see IMO resolution A.851(20) on General Principles for Ship Reporting Systems and Ship Reporting Requirements, including guidelines for reporting incidents involving dangerous goods, harmful substances and / or marine pollutants.

Note: All of the following phrases must come as the culmination (message content) of a radio message exchange between stations covered by the ITU Radio Regulations, and the relevant calling procedures have to be observed.

Message Markers

(i) INSTRUCTION

This indicates that the following message implies the intention of the sender to influence others by a Regulation.

Comment: This means that the sender, e.g. a VTS Station or a naval vessel, must have full authority to send such a message. The recipient has to follow this legally binding message unless he/she has contradictory safety reasons which then have to be reported to the sender.

Example: "INSTRUCTION. Do not cross the fairway."

(ii) ADVICE

This indicates that the following message implies the intention of the sender to influence others by a Recommendation.

Comment: The decision whether to follow the ADVICE still stays with the recipient. ADVICE does not necessarily have to be followed but should be considered very carefully.

Example: "ADVICE. (Advise you) stand by on VHF Channel six nine."

(iii) WARNING

This indicates that the following message implies the intention of the sender to inform others about danger.

Comment: This means that any recipient of a WARNING should pay immediate attention to the danger mentioned. Consequences of a WARNING will be up to the recipient.

Example: "WARNING. Obstruction in the fairway."

(iv) INFORMATION

This indicates that the following message is restricted to observed facts, situations, etc..

Comment: This marker is preferably used for navigational and traffic information, etc.. Consequences of INFORMATION will be up to the recipient.

Example: "INFORMATION. MV Noname will overtake to the west of you ."

(v) QUESTION

This indicates that the following message is of an interrogative character.

Comment: The use of this marker removes any doubt as to whether a question is being asked or a statement is being made, especially when interrogatives such as what, where, why, who, how are additionally used at the beginning of the question. The recipient is expected to return an answer.

Example: "QUESTION.(What is) your present maximum draft?"

(vi) ANSWER

This indicates that the following message is the reply to a previous question.

Comment: Note that an answer should not contain another question.

Example: "ANSWER. My present maximum draft is zero seven metres."

(vii) REQUEST

This indicates that the following message is asking for action from others with respect to the vessel.

Comment: The use of this marker is to signal: I want something to be arranged or provided, e.g. ship's stores requirements, tugs, permission, etc..

Note: REQUEST must not be used involving navigation, or to modify COLREGS.

Example: "REQUEST. I require two tugs."

(viii) INTENTION

This indicates that the following message informs others about immediate navigational action intended to be taken.

Comment: The use of this message marker is logically restricted to messages announcing navigational actions by the vessel sending this message.

Example: "INTENTION. I will reduce my speed."

A2 ON-BOARD COMMUNICATION PHRASES

A2/1 Standard wheel orders

All wheel orders given should be repeated by the helmsman and the officer of the watch should ensure that they are carried out correctly and immediately. All wheel orders should be held until countermanded. The helmsman should report immediately if the vessel does not answer the wheel.

When there is concern that the helmsman is inattentive s/he should be questioned:

"What is your heading ?" And he/she should respond:

"My heading is ... degrees."

Order	Meaning
1. Midships	Rudder to be held in the forward and aft position.
2. Port / starboard five	5° of port / starboard rudder to be held.
3. Port / starboard ten	10° of port / starboard rudder to be held.
4. Port / starboard fifteen	15° of port / starboard rudder to be held.
5. Port / starboard twenty	20° of port / starboard rudder to be held.
6. Port / starboard twenty-five	25° of port / starboard rudder to be held.
7. Hard -a-port / starboard	Rudder to be held fully over to port / starboard.
8. Nothing to port/starboard	Avoid allowing the vessel's head to go to port/starboard
9. Meet her	Check the swing of the vessel's head in a turn.
10. Steady	Reduce swing as rapidly as possible.
11. Ease to five / ten / fifteen / twenty	Reduce amount of rudder to 5°/10°/15°/20° and hold.
12. Steady as she goes	Steer a steady course on the compass heading indicated at the time of the order. The helmsman is to repeat the order and call out the compass heading on receiving the order. When the vessel is steady on that heading, the helmsman is to call out: "Steady on ..."
13. Keep the buoy/ mark/ beacon/ ... on port side / starboard side.	
14. Report if she does not answer the wheel.	
15. Finished with wheel, no more steering.	

When the officer of the watch requires a course to be steered by compass, the direction in which s/he wants the wheel turned should be stated followed by each numeral being said separately, including zero, for example:

Order	Course to be steered
Port, steer one eight two	182°
Starboard, steer zero eight two	082°
Port, steer three zero five	305°

On receipt of an order to steer, for example, 182⁰, the helmsman should repeat it and bring the vessel round steadily to the course ordered. When the vessel is steady on the course ordered, the helmsman is to call out:

"Steady on one eight two".

The person giving the order should acknowledge the helmsman's reply.

If it is desired to steer on a selected mark the helmsman should be ordered to:

"Steer on ... buoy / ... mark / ... beacon".

The person giving the order should acknowledge the helmsman's reply.

A2/2 Standard engine orders

Any engine order given should be repeated by the person operating the bridge telegraph(s) and the officer of the watch should ensure the order is carried out correctly and immediately.

(Engine-room personnel fully ready to manoeuvre and bridge manned to relay engine orders.)
8. Finished with engines – no more manoeuvring.
(Operation of engines no longer required.)

In vessels fitted with twin propellers, the word "both" should be added to all orders affecting both shafts, e.g. "Full ahead both", and "Slow astern both", except that the words "Stop all engines" should be used, when appropriate. When required to manoeuvre twin propellers independently, this should be indicated, i.e. "Full ahead starboard", "Half astern port", etc.

Where thrusters are used, the following orders are used:

9. Bow thruster full / half to port / starboard.
10. Stern thruster full / half to port / starboard.
